December 2024 - Feb 2025

Currently, it is contributing to the development and deployment of scalable web applications using modern technologies such as Docker, React.js, Python, Django, and Kubernetes. It is responsible for implementing containerized solutions, optimization of code, debugging

PROJECTS

Rise Up Startup - I have also built an e-commerce site using front-end technologies like HTML, CSS, JavaScript ,Reactjs ,Nodejs, ExpressJs, and MongoDB. I used Bootstrap for responsive designs and user-friendly navigation bars. The project was all about building an interactive interface with dynamic displays of products and smooth interaction with the users, thus making shopping

AWARDS
